

SSMVR - Poster flash presentations 1

Thursday, 23 Oct 2025, 10:15 a.m. - 11 a.m., Clubraum 7+8

Pathways of erythrocyte clearance in optic nerves pathway and olfactory nerves pathways, and dural lymphatic pathways in the perforation model of subarachnoid hemorrhage

Presentation time: 3 min

Presenting Author: Tangtang Xiang

The Impact of Substrate Stiffness and Endothelial Cell Aging on Glycocalyx Expression

Presentation time: 3 min

Presenting Author: Flurina Finn Schuhmacher

MYCT1-IFITM2/3 interaction balances energy storage and efficient antiviral defense of the endothelium

Presentation time: 3 min

Presenting Author: Anna Köck

Biofabrication of human 3D organ-specific lymphatic capillary networks for the study of vascular aging

Presentation time: 3 min

First Author: Mattia Cenciarini

Presenting Author: Valentina Colombo

Splenic artery pseudoaneurysm after blunt abdominal trauma and history of a bariatric surgery – a case report

Presentation time: 3 min

Presenting Author: Lara Zankena

Intrinsic Blood-Brain Barrier Dysfunction Contributes to Multiple Sclerosis Pathogenesis

Presentation time: 3 min

Presenting Author: Miwako Fujisawa

ChemR23 expression protects against smooth muscle cell phenotype switching in atherosclerosis.

Presentation time: 3 min

Presenting Author: Bryce Evans

Transient Immortalization Enables Expansion of Adult Human Dermal Blood Endothelial Cells Without Compromising Their Aged Phenotype

Presentation time: 3 min

Presenting Author: Andrea Uccelli
