

Freie Mitteilungen 11 - Peripheral Arterial Disease: Advances in Treatment and Technology

Saturday, 25 Oct 2025, 8:30 a.m. - 10 a.m., Deuxième

Chair: Christoph J. Zech (Basel), Aljoscha Rastan (Luzern)

Initial Results of a Novel Type of Laser Catheter for Endovascular Treatment of Peripheral Arterial Disease

Presenting Author: Vasile Bosca

Chirurgische Therapie des Rezidiv-Entrapment Syndroms

Presenting Author: Ulla Weihsbeck

First Author: Ulla Weihsbeck

Intravascular Lithotripsy for Paravisceral Coral Reef Aorta: A Multicenter Retrospective Study

Presenting Author: Florian Elger

Viabahn endoprosthesis for bypass anastomosis stenosis

Presenting Author: Yassine Haddad

Isolated femoral endarterectomy and profundoplasty without revascularization of a femoropopliteal occlusion in patients with chronic limb threatening ischemia

Presenting Author: Felix Möhle

Ultrasound-guided versus conventional closure device deployment following transfemoral endovascular procedures: a systematic review and meta-analysis.

Presenting Author: Moritz Wegner

The BYCROSS-Atherectomy device – a novel debulking system for treatment of the iliac, SFA and popliteal region

Presenting Author: Matthias Walter Mende

Low-Profile Atherectomy-Assisted Cruro-Pedal Angioplasty in Patients with Chronic Limb-Threatening Ischemia and Patent Femoro-Popliteal Bypass Grafts

Presenting Author: Efthymios Beropoulos

Steerable Sheaths Versatility in Transfemoral Endovascular Treatment of Superior Mesenteric Artery Lesions.

Presenting Author: Konstantinos Donas
